

Cross the River

Main purpose - To develop oral blending and segmenting of sounds in words.

Choose a selection of objects with two or three phonemes. There can be more than one of the same object. Make a river across the floor or ground outside with chalk or ropes. Give each child or pair of children an object and check that all the children know the names of the objects. The toy calls out the name of an object in sound-talk (e.g. p-e-g). The children who have that object blend the sounds to make the word and cross the river.
